

# Wireless Driver ID Tag Installation Guide

## Instructions for deploying your Wireless Driver ID Tag

**Remove the battery tab:** If your Driver ID Tag has a small clear plastic tab, please remove it before giving the tag to the driver. This activates the battery.

**Tag assignment:** Your Driver ID Tag has already been linked to your account, but you must assign it to a specific driver. To do this, visit the cloud platform and enter the tag number to assign it to the appropriate driver.
